

 Blockchain / AL / ML

Web3 Development

#010201

 CHF 9.000
exkl. MwSt.

 Beginn: offen
Ende: offen

 Dauer: 20 Tage

 Ort: Circle 6
Zürich Airport

 Blockchain / AL / ML

 DevOps

 Kubernetes / Openshift

 Cyber Security

 Microsoft Azure

 Amazon Web Services

 Google Cloud Plattform

 Programmierung

 Sensorik

 Digital Marketing

 VMware / Infrastruktur

 Apache Kafka

Key Learnings

Ethereum Virtual Machine Blockchain overview Basic operations in solidity Smart contracts Web3 applications

Target Group

Experienced: Junior Blockchain Developers

Anforderungen

Anforderungen Familiarity with some programming language

Programm Inhalt

Overview, Smart contract setup, Deploy smart contract to testnet, deploy smart contract to mainnet

Technologies:

Solidity, EVM

Result:

Fully operational smart contract running on ethereum mainnet
