Python 1: write your own python package!

#080202

 CHF 5.000
exkl. MwSt.

 Beginn: 30.10.2023
Ende: 10.11.2023

 Dauer: 10 Tage

 Ort: Circle 6
Zürich Airport

Blockchain / AI / ML

DevOps

Kubernetes / Openshift

Cyber Security

Microsoft Azure

Amazon Web Services

Google Cloud Plattform

Programmierung

Sensorik

Digital Marketing

VMware / Infrastruktur

Apache Kafka

Key Learnings

- Control Flow and basic logic
- Functions
- Error Handling
- Basic Data Structures
- Basic Algorithms
- Object Oriented Programming basics: Classes and Methods
- Introduction to RESTful APIs

Anforderungen

- No prior knowledge of programming is required
- Basic understanding of Unix-command line environment is useful

Programm Inhalt

Week 1:

- Introduction to Python
- Introduction to control flow
- Basic Data Structures
- Commonly used base python libraries

Week 2:

- Functions
- Modules
- Examples from Projects
- Write your own python package!
